Concrete Quality

Software for Concrete QA/QC & Mix Design

Special Feature Presentation

Field Test

Mobile access for on-site sampling & testing

Field Test is an optional subscription that enables users to access their Concrete Quality batches information from any device: Smartphone, Tablet or PC.

EMOBILE with FIELD TEST

The Field Test service enables:

- Gather concrete sampling and testing information on site with your Smartphone or Tablet
- Access with any device: Android, iOS, Windows Phone BlackBerry, PCs with Mac or Linux OS.
- Increase efficiency of lab technicians: record test information on the field which will be immediately available at the lab
- Access your data on-site for diagnosis and troubleshooting

Lightweight and to the point

Field Test is lightweight to reduce loading times and downloaded MBs. It simplifies the technician's work on the field.

Create new samples on the fly, and have the information immediately available for all your partners.

Information you can record on site:

- **General information:** batching plant, jobsite, mix design, etc.
- **Ticket:** number, concrete type, admixtures, water added at site, truck number and driver, etc.
- **Casting:** cast element, pouring method, jobsite curing, time of arrival and end of casting, etc.
- **Ambient conditions:** temperature, wind, weather, etc.
- **Sampling:** laboratory, customer, technician, concrete temperature, slump, air content, density, etc.
- **Testing:** record all the test available in the full app with details
- **Test specimens:** create any number of specimens with type, age and crushing date.

ALL YOU
NEED in
PLACE

Check information on site

Field Test allows you to perform complex searches to locate the exact sample you need. Review and update its information as you need.

Its powerful search engine allows you to filter and find the exact sample you're looking for

The search engine can filter by:

- **Ticket number**
- **Dates:** interval or set date
- **Sample reference:** you can add a reference or name to your samples and use it to look for them
- **Statistical control:** you can filter the samples for production control from those that are lab tests
- **Batching plant:** you can query all the batches produced at one plant
- **Jobsite:** get all the batches delivered to a certain jobsite
- **Mix Design:** find all the concrete batched for a given mix design
- **Combine them!** you can combine all the filters to create the exact query you need
